ABOUT THE COMPANY

RV Sinkler LLC is a SBA-registered small business delivering professional services in construction, project management, and energy infrastructure. Since 2008, we have supported public and private sector clients with high-quality building solutions.

In 2016, we expanded to include renewable energy technologies and environmental compliance services, aligning with federal goals for sustainability and resiliency. Our team provides end-to-end support from site assessments to construction execution, with a focus on performance, safety, and regulatory compliance.

DIFFERENTIATORS

RV Sinkler LLC stands out by delivering comprehensive construction services alongside advanced energy system integration. We manage projects from planning and permitting to final build-out, with expertise in site development, structural work, utility coordination, and compliance.

PAST PERFORMANCE

JOINT BASE-LANGLEY-EUSTIS, VA 2025- 2028

RV Sinkler LLC is delivering comprehensive grease trap maintenance and repair services at JBLE under a three-year contract. The scope includes all labor, materials, equipment, supervision, and transportation required to service multiple grease traps at the Langley AFB division.

FORT RILEY, KANSAS 2019-2022

Prime contractor with Dalkia Energy Group. Scope included design, fabrication, installation, and M&V of eight CHP units supporting multiple facilities (barracks, HQ, fitness center, pool). RV Sinkler led project and financial management, permitting, and construction oversight.

RESIDENTIAL CONSTRUCTION 2007-2021

RV Sinkler completed five residential buildouts in Virginia, including custom and ADA-compliant homes. We managed each phase from site prep to final inspection on projects ranging from \$250K-\$650K.

CORE COMPETENCIES

Our core offerings include residential and light commercial construction, CHP and microgrid integration, site assessments, O&M, and environmental compliance. We deliver end-to-end support from planning and permitting to remote monitoring.
